

# **BRITISH CORROSION JOURNAL**

**1991     Volume 26**

*Consulting Editor*

**A. D. Mercer**

**Published by:  
The Institute of Metals, 1 Carlton House Terrace, London SW1Y 5DB**

Effect of mix specification on corrosion of steel in mortars immersed in chloride solution C. J. Newton and J. M. Sykes	31
Corrosion study of industrially sintered copper alloyed 316L austenitic stainless steel L. Fedrizzi, A. Molinari, F. DeFlorian, A. Tiziani, and P. L. Bonora	46
Pitting resistance of weld metal for 22Cr-5Ni ferritic-austenitic stainless steels R. A. Walker and T. G. Gooch	51
Hydrogen evolution on freshly generated chromium electrode surfaces V. C. Noninski	60
Corrosion of underground structures due to acidification: laboratory investigation E. Levlin	63
Influence of prior deformation on the sensitisation of AISI type 304 stainless steel and applicability of EPR technique N. Parvathavarthini, R. K. Dayal, S. K. Seshadri, and J. B. Gnanamoorthy	67
Corrosion of galvanised steel in synthetic mine waters C. Allen	93
Brown staining of hot dip galvanised coatings in atmospheric corrosion F. Sjoukes	103
Effect of ultrasonically induced cavitation on behaviour of nodular cast iron in sea water V. K. Gouda, A. H. Al-Hashem, A. M. Abdullah, and W. T. Riad	109
Effect of $\text{Ca(OH)}_2 + \text{NaCl}$ environment on corrosion fatigue crack growth in cold drawn eutectoid steel rods N. Singh and V. Sanchez-Galvez	117
Corrosion of porous iron electrodes containing metal additives in alkaline batteries N. Jayalakshmi and V. S. Muralidharan	123
Corrosion behaviour of molybdenum alloyed low residual carbon steels in HCl solutions J. N. Al-Hajji and A. M. Nawwar	127
Chemical and electrochemical behaviour of titanium in methanol-water-HCl mixtures M. M. Al-Abdallah	133
Corrosion of standard and modified 9Cr-1Mo ferritic steels in high temperature water containing acid sulphate-chloride C. B. Ashmore, L. Tomlinson, P. J. B. Silver, and A. P. Mead	135
Room temperature stress corrosion cracking of stainless steels in indoor swimming pool atmospheres J. W. Oldfield and B. Todd	173
Depletion of concentration driving force and decay of corrosion down a pipe B. Poulson and B. Chexal	183
A double cycle polarisation technique for corrosion studies on metal matrix composites S. L. Coleman, B. McEnaney, and V. D. Scott	186
Meaning and measurement of corrosion potential L. Krivián	191
Comparative evaluation of alkyd, bituminous, and epoxy paints on steel in chloride media by impedance spectroscopy A. Amirudin and D. Thierry	195
Localised corrosion of high chromium superferritic alloys I. M. Wolff, P. Park-Ross, and A. Ball	202
Atmospheric corrosion of carbon steels and weathering steels in Taiwan Feng-I-Wei	209
Influence of iron addition on corrosion layer built up on 70Cu-30Ni alloy in sea water A.-M. Beccaria and J. Crousier	215
Evaluation of intergranular corrosion susceptibility in an as welded high alloy austenitic stainless steel casting C. McCaul	239
Nickel migration from Cr-Ni stainless steel exposed to potable water W. Schwenk	245
Corrosion inhibition by tungstate in aqueous solutions and its application to coal-water slurries V. S. Sastri, C. Tjan, and P. R. Roberge	251
Stability of passive films formed on aluminium in aqueous halide solutions W. M. Carroll and C. B. Breslin	255
Kinetics of stress corrosion crack propagation in AA 7039 using double cantilever beam specimens Su-Il Pyun, Moon-Hee Hong, and Hong-Pyo Kim	260
Technical note Corrosion behaviour of materials in the syrupy liquid obtained by prolonged heating of orthophosphoric acid F. N. Smith and H. van Droffelaar	265

Corrosion of aluminium alloy AlMg4 in NaCl solutions containing disodium salt of ethylenediamine-tetracetic acid at various concentrations and pH values	
C. Wrubl, A. Mollica, and U. Montini . . . . .	268
Effects of temperature on dezincification and electrochemical behaviour of 70-30 brass in sulphuric acid	
M. I. Abbas . . . . .	273
Electrochemical and spectroscopic studies on dezincification of $\alpha$ brass Part 1: Effect of pretreatment on surface composition of 70-30 $\alpha$ brass	
T. M. H. Saber and A. A. El Warraky . . . . .	279
Corrosion performance of titanium and titanium stabilised stainless steels	
L. H. Boulton and A. J. Betts . . . . .	287
Bengough Medal and Prize 1991 . . . . .	79
Book reviews . . . . .	22, 83, 169, 229
Conference reports	
UK Corrosion 90 . . . . .	16
Microbiology in civil engineering: the buried problem . . . . .	19
Market led materials development . . . . .	20
CASS'90: Corrosion by air, sea, and soil . . . . .	21
2nd EFC Workshop on Microbial Corrosion . . . . .	89
16th International Galvanizing Conference . . . . .	165
3rd International Zinc Coated Sheet Conference . . . . .	167
Eurocorr '91 . . . . .	234
Lifetime prediction of corrodible structures . . . . .	236
Electrochemical noise: the technique for the '90s? . . . . .	238
Corrosion news and views . . . . .	1, 77, 149, 221
Development of nickel based corrosion and wear resistant alloy manufactured by reaction sintering	
hipping process . . . . .	29
EAST update . . . . .	14, 80, 155
Forthcoming corrosion events . . . . .	26, 90, 162, 231
Institute of Metals Awards 1991 . . . . .	79
